Professional Profile

Full Stack Developer who works with **AI agents every day**. I build with React, Next.js and Node.js, and use **Claude Code and Codex** to take ideas to production faster without losing control of the code. I currently work as a Software Developer at Neural.ONE, building landing pages, web applications and interactive formats for clients in the advertising industry. With AI built into the whole process I plan, write, review and refactor code, and I have built **my own skills** that automate repetitive work. AI speeds things up; technical decisions and quality stay with me.

Experience

Neural.ONE **March 2025 – Present**
Software Developer *Madrid*

- Built **landing pages and web applications with React and Node.js**, delivering in 1 to 2-week cycles with direct client reviews.
- Standardized the base structure for **rich media banners**, reducing **rendering issues by approximately 60 %**.
- Automated campaign trafficking with **Python scripts and custom Claude Code skills** (uploading creatives to S3, building VAST tags and validating configurations), saving approximately **5 hours of manual work per week**.
- Implemented **tracking and analytics** to measure conversion and digital campaign performance.

Projects

Kata (型) | *Next.js · Supabase · PostgreSQL* | Code | Demo

- Full Stack platform for organizing books, video games, movies and series, with **authentication** and data persisted in **Supabase (PostgreSQL)**.
- Integrates **TMDB, IGDB and Google Books** and provides instant client-side search and filtering.

DeltaZero | *Next.js · TypeScript · Recharts* | Code | Demo

- Formula 1 analysis dashboard with **comparative telemetry for up to five drivers**, a **synchronized circuit map**, and tyre degradation and strategy analysis.
- **Static frontend architecture** over OpenF1 and Jolpica, with request queuing, fault-tolerant parallel loading and client-side derived calculations.

GridRush | *React · Node.js · Express* | Code

- Web platform for managing karting competitions, from driver registration and race operations to **real-time standings**.
- Client-server architecture with **React** and a **REST API built with Node.js and Express**.

Education

I.E.S Gaspar Melchor de Jovellanos **September 2023 – June 2025**
Higher Degree in Web Application Development *Madrid*

Skills & Tech Stack

Skills: **AI agent-driven development** · React & Next.js interfaces · APIs & backend with Node.js · Python automation · Tracking & digital analytics · Deployment & CI/CD

AI & Agents: Claude Code, Codex, GitHub Copilot, n8n

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, TanStack Query, Zustand

Backend: Node.js, Express, Python, Java, MySQL, PostgreSQL, Supabase, REST APIs

Cloud / DevOps & Tooling: Docker, Amazon S3, GitHub, GitHub Actions, Vercel

Languages: Native Spanish · English B2

Other: Driving licence (B and A1), own vehicle
