Professional Profile

Full Stack Developer who works with **AI agents every day**. I build real web products with React, Next.js and Node.js, and use **Claude Code and Codex** to plan, write, review and refactor code, taking ideas to production faster without losing control of the code. I have built **my own skills** that automate repetitive work. AI speeds things up; technical decisions and quality stay with me.

Work Experience

Neural.ONE **March 2025 – Present**
Software Developer *Madrid*

- Built **landing pages and web applications** with **React and Node.js** for advertising clients, delivering in 1 to 2-week cycles with direct client reviews.
- Standardized the base structure for **rich media banners**, reducing **rendering issues by approximately 60 %**.
- Automated campaign trafficking with **Python scripts and custom Claude Code skills** (uploading creatives to S3, building VAST tags and validating configurations), saving approximately **5 hours of manual work per week**.
- Implemented **tracking and analytics** to measure conversion and digital campaign performance.
- **AI-assisted development** across the whole cycle: Claude Code and Codex to plan, write, review and refactor, with technical review and quality kept under my control.

Projects

DeltaZero – Formula 1 Analysis | *Next.js · TypeScript · Recharts* | Code | Demo

- Formula 1 analysis dashboard with **comparative telemetry for up to five drivers**, a **synchronized circuit map**, and tyre degradation and strategy analysis.
- **Static frontend architecture** over OpenF1 and Jolpica, with request queuing, fault-tolerant parallel loading and client-side derived calculations.

Kata | *Next.js · Supabase · PostgreSQL* | Code | Demo

- Full Stack platform for organizing books, video games, movies and series, with **authentication** and data persisted in **Supabase (PostgreSQL)**.
- Integrates **TMDB, IGDB and Google Books** and provides instant client-side search and filtering.

GridRush – Karting Competitions | *React · Node.js · Express* | Code

- Web platform for managing karting competitions, from driver registration and race operations to **real-time standings**.
- Client–server architecture with **React** and a **REST API built with Node.js and Express**.

Education

I.E.S Gaspar Melchor de Jovellanos **September 2023 – June 2025**
Higher Degree in Web Application Development *Madrid*

Tech Stack

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, TanStack Query, Zustand

Backend: Node.js, Express, Python, Java, MySQL, PostgreSQL, Supabase, REST APIs

Cloud / DevOps: Docker, Amazon S3, GitHub, GitHub Actions, Vercel

AI & Agents: Claude Code (custom skills), Codex, GitHub Copilot, n8n

Languages: Spanish (native), English (B2)

Other: Driving licence (B and A1), own vehicle
